# How to make your Origami Fish
Step 1: Select a piece of SQUARE paper.

Step 2: Start by folding a square piece of paper diagonally (both sides) and in half (one side) – crease and unfold as shown on the first image below.

Step 3: Hold the paper as indicated with the small dots on the sides and fold towards the center to get a triangle shape.

Step 4: Now hold the right bottom corner of the triangle and fold it toward the center along the crease shown on the first image below.

Step 5: Do the same with the other corner – we've got fish tail!
